Subject: 10-1 Legerage Proposal

Dear CFTC.

This proposal to lower leverage once again will only kill markets and make trading impossible in forex markets. There is simply not enough volatility in forex markets to make trading possible. I have been a participant in the markets for years and this over regulation will not "fix" anything. Those that want to abuse and manipulate ANY market will do so regardless the rules.

I understood, and could see some benefit, of the lower leverage instituted in 2009. Over regulation and government involvement in forex markets will prove to be nothing short of killing a market.

I OPPOSE THE 10-1 PROPOSED LEVERAGE REQUIREMENT AND ASK YOU TO TAKE MORE TIME TO STUDY THE ISSUE AND LEARN THAT QUICKLY IMPLEMENTING NEW RULES WILL NOT PROVE EFFECTIVE.

Regards,
Aaron Gale
