**Subject:** Regulation of Retail Forex

---

To Who It May Concern:

I understand that the CFTC is considering new regulations (Ref. 5772-10) for the retail forex market, particularly a change in leverage to 10 to 1. I strongly object to this new regulation and want this regulation removed from your consideration. It is unnecessary, intrusive, and damaging to my trading efforts. This is just another effort by my government trying to run my life, which I do not need! I see what is happening now in our economy and fear what could happen if this regulation is put in place. The American people do not need you to run our lives and we do not need you running the retail forex market.

Sincerely,

William Lader
