Subject: Regulation of Retail Forex

Hello,

New proposed regulation which will limit the leverage of currency pairs to 1-10 ratio **is a new way to increase unemployment** and for people to move their trading accounts overseas.

I believe passing such a regulation will not only be counter productive but **will lead to US dollars being transferred out of the country**. The unemployment rate in US is already at 10% and passing such regulation which does not support employment opportunities in USA are counter productive.

Save USA from destructive laws that erode our country's freedom!
