Subject: CFTC's New Leverage Requirement

Dear CFTC

Getting straight to the point, setting the leverage to 1:10 would kill the source of income to some traders who depend on the income to support their families. If CFTC really want to safeguard the interest of retail traders, there are other ways to do it. Today we are living in a world of democracy where people have the rights to make choices. CFTC need not safeguard the interest of retail traders, most traders who blow their forex accounts would definitely not dabble into the forex business again. For myself, I am strongly against this move by CFTC. I cringed when I first heard the news of the "future" leverage.
