David Stawick
United States Commodity Futures Trading Comm

Dear Mr. Stawick

It was brought to my attention by our propane provider that the CFTC has proposed Federal Speculative position limits on energy. I urge you to please pass this. I am a small poultry grower in Arkansas and over the past five years I have seen prices go from \$.50 to \$1.85 a gallon for contracted prices. This is far less than normal households pay. People and farmers too have been cut. Our pay has been cut over 8%, but our expenses stay the same. Washington can bail out all these big businesses and expect us, the little people to pay for it. Then you have speculators on wall street running up the prices of energy and we are expected to pay for that so they can make more money. We the people of the United States can't afford to pay anymore. There are old people that have to decide if they want to stay warm in the winter or buy their meds. I am like all the other Americans, I'm tired of having to pay more for gas and propane because some guy on Wall Street buys up a bunch and runs the prices up. So I again I ask that you pass this bill to help all Americans.

Sincerely,
