Subject: Regulation of Retail Forex

This is regarding RIN 3038-AC61.

I think it's ridiculous to Forex trading leverage to 10:1. If the goal is to protect customers like me, it is then to enforce Forex brokers to get licensed and submit their financial reports to you to review. By changing the leverage to 10:1, it does not protect traders like me.

Simply put, I don't like this change. My vote is no.
