Subject: Regulation of Reatil Forex--RIN 3038-AC61

Hello,

I am very concerned about the fact of you wanting to change forex leverage for retail forex traders to only 10:1. We are very capable of knowing how to manage our accounts and our risk in trading forex. You have messed up things bad enough already by the first in first out rule change. That is more inconvenient and has cost me money because of the complication of that ruling. I went to a different broker that was overseas because of that. You just don't want anybody to make money?? This is nothing short of pure communism. You are without a doubt, part of the problem and not part of the solution. You are hurting business in this country and sending it all out of the country. Maybe that's your plan--it seems to be. Leave it alone.
