Subject: Regulation of Retail Forex

RIN 3038-AC61

Please leave the current 100:1 ratio for margin.

Please don't treat us like babies. You've already made many changes, that have boosted the forex companies of other countries that don't have to follow these silly rules. The new 10:1 ratio would essentially kill forex in the United States. Many jobs would be lost. The only result is that we would all open up forex accounts overseas. Already many have done this because of last years changes. Those changes were dissapointing, but acceptable. The margin change is unacceptable!

**Thank You,
Brent Adams**
