**Subject:** Regarding Regulation of Retail Forex

---

As an average American entrepreneur, one of the main draws to the forex market is the leverage availability. I feel we are big boys and girls so we dont need nor do we want the regulation of our leverage.

RIN 3038-AC61 is a no go for me and every one of the investors I know. Many of us smaller investors will be greatly hindered by any regulation of our leverage. Please rethink this issue.

Sincerely

David Dey
