Subject: 'Regulation of Retail Forex'

I just wanted to put my two cents on the proposal to limit leverage in retail Forex accounts **RIN 3038-AC61**. As a Forex trader and small businessman, the thought of somebody determining for me the amount of risk that I should take in a trade is insulting. I understand the intent of making the changes but we are all adults and part of the process of becoming a trader lies in our ability to evaluate all aspects of a trade. The risk or amount of leverage should be left up to the individuals placing the trade.

Sincerely,

Dwayne Cooper
