Subject: 'Regulation of Retail Forex'

RE: RIN 3038-AC61

Dear Sir or Madame...

It has come to my attention that that CFTC is once again trying to tell the American trader what we can and cannot do with our own money... by further limiting margin on retail forex trading to 10:1...

you people need to stop trying to protect us traders from ourselves and instead focus your efforts on more important tasks such as closing down scam brokers and putting fraudulent software and trading system peddlers in jail... just to name a couple...

I work hard for my money and if i wish to lose it all trading the markets, then that is my choice and it needs to remain as such...

just my 2 cents...

thanks

David Grier
