Subject: Regulation of Retail Forex

RIN 3038AC61

To whom it may concern

I was not aware that the CFTC has been given the right to take away People's freedom of choice. Not even my Government can do that without changing the Bill of Rights. This in my opinion is unacceptable. Leave people to do what they want as long as it is legal and acceptable within the community. Don't scratch were it does not itch. You are busy killing an Industry. People will find a way around this should you choose to remain on this path of destruction. Wake up and smell the Coffee, this is forex not futures.

Thanks

Nic Vos
