Subject: Proposed CFTC Changes

---

Dear Sir,

I understand that CFTC is proposing changes to limit the maximum leverage of forex trading to 10:1.

I personally strongly object this proposal as this will very much affect retail traders like us. I fully agree that your esteemed organization to provide proper education and information to highlight the risks in trading forex. Changing the leverage will not lower the risk factors, understanding the nature of forex is the key factor.

Hopefully you will take this into consideration.

Thank you

Vivian
