Subject: Ref : Proposed leverage 10:1 Not a Good Idea for Forex tradings

Dear Sir:

In these economic difficult time, you must provide more flexible rules for trading FOREX than making them less flexible, so that capitals & funds don't fly to foreign countries for trading's. The more you put stringent regulation, the more you hurt the USA economic, push interests to over seas, yet we need the capitals stay here at home to revive our damaged economic. Think about it.....

I am against this proposal and vote a big "NO"
