Subject: Regulation of Retail Forex

RIN 3038-AC61

I am sending this message as a customer who uses the forex broker with the about RIN; I just wanted to say that changing leverage amounts to 10 :1 will eliminate traders like me with small accounts (\$2000). The 100:1 leverage is the only reason why I am able to get into the market and trade.

If any regulations are made they should be done with consideration of the account size so different leverages based on the account size:

100:1 -> accounts <\$50,000
10:1 -> accounts >= \$50,000
