Subject: Regulation of Retail Forex

Hello CTFC,

I am the user group president for Wizetrade 4x based out of Los Angeles and also home for MB Trading brokerage firm. I hear that you are planning a proposal to change the leverage of 4x brokers from 100:1 to 10:1. **This is a really bad idea** and everyone I have talked to strongly opposes this type of drastic change because it takes away almost all the freedom that traders like myself currently have. I am voicing my opinion on behalf of the majority of traders in the Los Angeles area.

I hear that the proposed amendment is to help traders such as myself. I am saying directly to you that this is a bad proposal and request that this proposed rule change be denied.
