Subject: Changes

Dear Sir, Please don't change the margin rules! They have already been reduced from 400:1 to 100:1 - and now the proposal is to reduce it further to 10:1; let the people and market participants determine their own risk and rewards - don't penalize the professionals to protect the amateurs, who shouldn't be in the Forex game, (except as students). Please leave the option of making some decent money on the table!

Thanks, Jim Duross
