Subject: *Proposed Fed Speculative Position

Dear David;

Please actually establish a speculative position limit in Comex Silver or no more than 1500 contracts. Plus, restrict any hedging exemptions from those limits.

Basically, STOP levels of concentration in COMEX silver futures, which seem to be on the short side the last several years.

Please move to improve the integrity of our markets!

Thank you for this opportunity, for listening, and hopefully for taking action to correct this manipulation.
