Subject: Silver position limits

Dear Sir;

Thank for the opportunity to comment on the issue of position limits for precious metals. Please establish no speculative position limits in COMEX silver market. The reason I ask you to keep the current system is so that the silver market can continue to be manipulated by the big four banks. Please allow this electronic short manipulation to continue to suppress the price of silver so that the general public can continue to accumulate real physical silver at these artificially low prices. Please don't restrict any hedging exemptions in any way to any illegitimate or legitimate hedgers. Please don't stop the levels of concentration in COMEX silver futures that have been experienced over the past few years on the short side of the market. By now you must know that manipulation of the precious metals markets is fooling no one. Please allow the world largest ponze scheme to continue until it comes crashing down in one spectacular spectacle.

Best Ever,

Joe Personett
