Subject: Contract Limits

Greeting:

You folks are supposed to be insuring a fair and honorable market system. Precious metals is not such a market and only the blind, ignorant or complicit would attempt to deny such fraud in progress.

I know it is a mess. And I know there is no easy fix because it has gone on for so long. And finally, I know that if you choose to do the right thing, changes will take place.

Please enforce limits and eliminate the exemptions these rouge traders (*banks*) hide behind to do their manipulations.

**Thank You
William R. Meighen**
