Subject: position limits for precious mtals

Dear Commissioners:

I appreciate the opportunity to comment on the subject of position limits for the precious metals. I believe that a speculative limit of 2 or 3 percent of world mine production would be beneficial to to market stability. I also believe that the two or three largest holders of positions should be public information which would also contribute to market stability.

The above would effectively put an end to the current manipulation of the COMEX futures markets.

Thank you for your decision to address and improve the integrity of the precious metals market.

Sincerely,
James M. Roberts
