Subject: Limits on COMEX Silver Market

Dear Sir,

Thank you for your latest action pertaining to the investigation into silver manipulation on the COMEX. It seems there is relevant issues pertaining to the large concentrated positoin in this market, and I readily support your efforts in setting reasonable limits to 1500 contracts on the short side. It would also be desireable to restrict any hedging exemptions form those limits to legitimate hedgers. Again, Thank You for looking into the issues of concentration and manipulation, and taking this seriously.

Sincerely,

George Offerman
