Subject: Proposed Federal Speculative Position

Dear Sir:

We need to establish speculative position limits in Comex silver of no more than 1500 contracts. We need to restore fair play to the market. I believe that an important issue that ultimately drives the price of the silver market is being ignored too long. The issue is the big corporation that uses their leverage to manipulate the silver market. For too long the the big Wall Street firms use their leverage to control the price of silver and the regulators - who are under funded and under skilled - allow this to happen. The regulators attitude of "let's not rock the boat" will come back to bite them and cause great harm to America. You have an opportunity to do something about this. Have the courage to stand up for what is right and put limits on the silver contracts.
