Subject: Please end the gold/silver manipulation

Just a guy that requests that the CFTC to please end the corruption on the gold and silver markets. On your recent CFTC meeting you had a whistle blower state that things are being manipulated in the market. There is also alot of data to back up GATA on these issues. Please don't insult my intelligence and state there is no problem because there is a problem, bad problem. Just do the right thing and investigate the problem. There are many i work with that were hoping the new commissioner head of the CFTC would understand and do something about this issue.

I just hope you all are not paid off and will stick up for the little guy like me.

With all this said, even with all the evidence that was shown to you all how can you ignore the problem. Why not go look in the Canada vault and verify how much gold is in there, why not do that simple thing.

To alot of us it seems that the CFTC is just another paid off group to keep the manipulation going.

I guess when you are old and on your death bed you will reflect on these issues and wish you would have done something to correct the matter.

Have a good day

ED
