Subject: Proposed Federal Speculative Position

Dear Sir:

I appreciate the opening for my comments about position limits for precious metals. Please make a speculative position limit in COMEX silver of 1500 contracts. Please restrict hedging exemptions from those limits, including legitimate hedgers. Please end the concentration level in COMEX silver futures that have existed for years on the market's short side.

Thank you for your work to put integrity in our market.

Graciously, Steven Cuff
