It is past time to end the fraudulent action perpetrated by short selling and illegal hedging in the metals market.. Honest, tax paying, citizens like me are being cheated by the refusal to put an end to this fraud by the government offices that are suppose to protect us and prevent what is continually happening. It is time for all of you to do what you have been sworn to do.

We need position limits for precious metalsl. We need to restrict any hedging exemptions from those limits to legitimate hedgers.
Sally Shumway
