Subject: precious metals at Comex

Dear Sir;

I'm writing in favor of contract limits for the shorts who, in the case of banks, are not really legitimate hedgers in my opinion. I think Americans deserve a level playing field in these markets. I won't get into the oversized short position issue which has been complained about for years; however, I do think that the activities of JP Morgan et al in the Comex market, need to be reigned in immediately. Please, let's make this a fair market for all Americans.

Thanks for listening.
