Subject: CFTC HEARING 3/25/10

After reading the published reports on the metals hearing, I respectfully request that the CFTC do all within its power to ensure the fairness of the market vis-à-vis short positions, concentrations and possible market manipulation. Individual investors, like myself, need to perceive the fairness of the metals market and the reports seem to indicate that may not be the case. Inaction by the CFTC at this time will not engender trust and confidence.
