---

I was pleased to see you held a hearing on March 25, 2010 regarding position limits on gold and silver. As a small time investor, I feel it is mandatory on your part to reduce position limits on precious metals. I've read numerous articles over the years on precious metals and perhaps a reduction around 1500 to 20000 would be appropriate. The concentration of metals by the big boys has really screwed up the free market in metals, particularly for small investors such as myself. After reading the minutes of your meeting on March 25th, I am confident you will arrive at a just conclusion on metals.

Thank you for giving me the opportunity to express my thoughts on this matter.
