**Subject:** Comment on March 2010 hearings

---

Commissioner :

Thanks for asking for the publics 'comments' regarding the recent March 2010 hearing on position limits on the precious metals.

**My 'Comment'** : If Andrew Maguire's, and Bill Murphy's testimony is true then your office has been aware of and/or has been complicit in the biggest fraud in the history of the planet. Its been common knowledge for anyone familiar with the metals markets that the Fed manipulates gold and silver prices lower through their agents JPMorgan and others. Sure looks to me that the CFTC is basically an arm of the Fed and aids and abets the fraud and manipulation. Its going to be real interesting to see how your office spins it or tries to cover it up.

**My Two Cents** : Private bankers creating 'money' from nothing and charging 'interest' on every dollar created has been responsible for more suffering than Mao, Hitler, Stalin and Pol Pot put together times ten. The shameless US policies of war and welfare are its direct result.

Most folks including those in government, are absolutely clueless as to the massive fraud put over the entire world by private bankers. After all there has been almost two generations of propaganda, spin, and distractions to cement the con into the fabric of society. Gold and silver are money and nothing else is. The Comex and 'Bullion Banks' are a dog and pony show for the masses while their ultimate purpose remains hidden : the suppression of gold and silver prices to protect the bankers monopoly on money creation and the power it bestows. Most folks are clueless but there are, obviously, those that know exactly what is going on : God help us all if a few more brave men cannot come clean and clear their consciences and refuse to participate in this insidious scheme any longer.

Sincerely,

Jim Farrell
