Subject: Opposition too ---- RIN 3038-AC61

To Whom it May Concern.

I am very much opposed the new regulation that is being contemplated, about changing the Max Leverage down too 1:10 from 1:100.

I do not need any one telling me how to trade and what is best for me. Any good and knowledgeable trader should have strict money management rules employed into their trading style.

I currently am leveraged 1:100 and I am doing just fine. If this regulation is brought in I will proceve it as the regulating body trying to limit my potential income for my business.
