Well the bullion banks are at it again. Even more short a week after your so called hearing. No doubt you will do nothing. . Sooner or latter this thing is going to blow up on you as the world is running out of physical precious metals at the present repressed prices. You folks ought to resign if you can't take the heat because when this thing the bullion banks are doing (at the behest of the governments no doubt) blows up, a lot you are going to be facing jail time. Think it can't happen? Ask Bernie Madoff. The testimony of Jeffrey Christian was mindbogling. The London market is supposed to be the physical backstop for most of the gold in the world. To think it's leveraged 100 to 1 is revealing the whole precious metals market is rigged. No doubt the higher ups in government will be immune but you folks will not. You will be sacrificial lambs! Don't kid yourself, in the end supply and demand always works. Expect this ponzi scheme to blow up at the latest 1 year to 18 months. You should stop the manipulation or quit. Time for you is running out!
