Subject: position limits and concentration in COMEX silver

I urge you to establish a speculative position limit in COMEX silver of no more than 1500 contracts and to stop the high levels of concentration in COMEX silver futures on the short side of the market. Hedging exemptions from the 1500 contract limit should be restricted to legitimate hedgers and not be available to those attempting to manipulate the market.

Thank you for addressing this issue.

Sincerely,

John G. Lowe
