**Subject:** Regulation of Retail Forex

---

David Stawick or CFTC,

Rather than spending your efforts to regulate the prices between brokers you threaten our opportunity to trade Forex. Why I say?

Your commission is supposed to be there to help privet trades, not tie our hands behind our backs so the financial institutions continue to rake in tax payers money.

RIN 3038-AC61

It would be nice is your office sent out a message showing support so we would appreciate what you do instead of despise it!

Rich
