Subject:

To whom it may concern;

I am grateful for the opportunity to comment in response to the hearing on position limits for precious metals. I fully support the CFTC in setting reasonable position limits that would prevent excessive speculation and concentration. It has been proposed that speculative position limits be set at 1500 contracts for Comex silver. I fully support this level, and deem it appropriate and necessary. The CFTC should restrict any hedging exemptions from those limits to legitimate hedgers. The levels of short side concentration in COMEX silver futures over the past few years has been tremendous. Please take action immediately. If there has been evidence of manipulation in the past, please punish responsible parties appropriately. I fully support Chairman Gensler and the rest of the commission in seeking international (LBMA specifically) cooperation in terms of position limit enforcement.

Sincerely,

Ty Bennett
