Subject: Precious Metals Position Limits Public Comment

Thanks for the chance to comment on the issue of position limits for precious metals. Here's how I stand: please set speculative position limits in COMEX silver of no more than 2500 contracts and restrict hedging exemptions from those limits to legitimate hedgers. Fair trading rules are needed to stop the levels of concentration in COMEX silver futures that have occurred in past years on the short side of the market.

Sincerely, Kenn Koller Akron OH USA
