**Subject:** Excessive regulation of the Forex Market

---

Gentlemen or Ladies (being politically correct),

I understand that you are considering changing the margin requirements when trading Forex. I am asking you to ***please not*** change the margin requirements.

I am not an employee or have anything direct affiliation with any American brokerage firm.

I just want the American brokers to have equal opportunity with brokers in other communist countries like ours throughout the world. This regulation would accomplish nothing more than helping the rich get richer and take opportunity away from the small retail investor.

We have a difficult time pulling money from the market without the CFTC working against us.

Thank you for reading my note.

John Schneider
