Subject: Positions limits on gold , silver, and others on the Comex

Ladies and Gentlemen- During the recent hearings on position limits it became very apparent that serious problems exist because of no position limits on the Comex. If you do not restore confidence in the investing public by not making the Comex a trusted, fair, and rock solid entity we will most likely witness a shift away from USA and UK by the investing public. Remember in the old western movie when a cattle stampede starts no just two or three steers run, but the whole herd goes. This could happen overnight if some Mideast or Far East market attempts to replace you. Please impose position limits for all participants.

Thank you for holding the hearing.

Sincerely
Dr. Arthur K. Parizek
