Sirs,

I want to comment on the issue of position limits for precious metals. You definitely should establish a speculative position limit in COMEX silver of not more than 1500 contracts.

Additionally, restrict any hedging exemptions from those limits to legitimate hedgers.

You should also stop the levels of concentration in COMEX silver futures that have been experienced over the past few years on the short side of the market. That's a killer. With all of the previous done our markets will not serve various special interests and become as they should be.
