Subject: Limits on Silver positions

Thank you very much for allowing the public to comment on the issue of position limits for precious metals. Please establish a speculative limit in COMEX silver of no more than 1500 contracts. The present situation with no limits has caused a serious misrepresentation of the value of silver, which is untenable in the long term. Please stop the levels of concentration in COMEX silver futures that has been going on for a number of years on the short side of the market. Thank you for your attention to the very serious matter.
Sincerely yours,

Chris Taylor
