Dear Sir;

Thank for the allowing me the opportunity to comment on the issue of position limits for precious metals.

I am very much in favor of the establishment of " a speculative position limit in particularly in COMEX silver. " I think a limit of no more than 1500 to 2000 contracts is an adequate volume for legitimate traders.

Please restrict hedging exemptions from these limits, to only legitimate hedgers with actual use of the material.

Please user your commission to stop the high levels of concentration in COMEX silver futures. I believe there to be sufficient evidence to conclude that in the last few years, certain entities have used overwhelming short positions to restricting free markets trading.

Sincerely,

Brian Anderson,
