Subject: SEC / CFTC??

The SEC dropped the ball with their refusal to reign in:

- I. Gross and ritual Naked Shorting
- II. Front Running
- III. Bernie Madoff
- IV. Bogus Financial Instruments and Derivatives

The apparent metals manipulations recently brought to light, is on RICO on steroids.

The first sign of a third world country is the selective enforcement of it's laws. The CFTC has an opportunity to show the world that the rule of law still exists in the US or it's bienvenudo a la tercero mundo!!

The choice is yours.
