Subject: Comex position limits

Dear Sirs.

I am very pleased to see the CFTC taking a serious look at the issue of position limits in the metals market. I would like to add my support to imposing limits of 1500 contracts in the silver market. More importantly however is to eliminate any entity from being exempt of these limits unless they are legitimately a hedger in the industry and not just a financial institution. Imposing limits and not doing so would be pointless and not reduce the massive short position accumulated by a couple of organizations which is at the heart of the problem.

My faith and hope is with you. Thank You Bob Finch
