Subject: What to do with the metal market?

Hello

You asked what should be done about the current PONZI Scheme in the metals market?

I say do nothing!

For I think it is GREAT that I can continue to trade my US Toilet paper aka the US dollar for real things. The longer it last the better for me. In due time the natural market forces will force the exposure of the Ponzi Scheme the US Guberment along with the FED has been running for all these years with YOUR help of course. Don't worry about Regulation for there is no where in this Government today that has ANY!

Keep up the Great work of covering up the SCAM for I am just a Hick from the Mid-west that is able to see what is really going on and I am afraid when everyone else figures out the Scam I may not have enough Precious Metals to buy my new home in another Country.

Why are you worrying now about the Cover up that you helped create? Are you afraid you may be placed in jail for Financial Terrorism aka TREASON against the Country you are sworn to protect?

Let it ALL Crumble! I for one WELCOME the wrath!

Sincerely

Lawrence Shultz
