Subject: metals inventories

How is it that your department allows many more times the volume of actual product to be "bought and sold" with paper transactions. If I tried to "sell" something that I didn't own, they'd call that a crime.....yet you folks allow this everyday. Talk about the need to reform! But, I guess if your in on the game, and your nod of approval comes from non other than Tim Geithner & Co., I guess you might as well light the cigars and pour the brandy!
