Subject: Metals Hearing

Dear Comissioners (especially Comssioner Chilton).

I want to thank you for the hearing on metals. It was wonderful.

Aside from all the technical stuff.... what it really comes down to is right and wrong. Just this. If there is something wrong that you have the power to correct in the metals market, I pray that you will. You have so much support in this.

For me, the hearing you presented on metals gave me a new, positive perspective of government agencies.

Thank you,

Gary Carroll
