Subject: Proposed changes to Forex leverage!

Hello,

I am voicing my opinion regarding the proposed change to reduce Forex leverage from 100:1 to only 10:1. This would be disastrous to many traders, including myself. I make my living by trading currencies on the Forex market and the regular use of 100:1 leverage is key to my successful trading. Please reconsider this proposed change, as it will greatly reduce the profit potential of many Forex traders. This is NOT a good change!
