Subject: metal position limits

CFTC Commissioners:

When Brooksley Born was chairperson of the CFTC she sounded the alarm with regard to the dangers of unregulated swaps and derivatives. Had Ms. Borns' clarion call been heeded by lawmakers and regulators the financial catastrophe which followed could have been avoided.

I call on the CFTC to act in the spirit of Ms. Born. Stand against the special interests, the powerful, and the establishment. Protect the people's interest from the Too Big to Fail financial manipulators. Their manipulations will destroy the metal markets as surely as they did the financial markets. Only you can prevent it from happening.

Respectfully,

Mark Frantzen
