Subject: Precious Metals Meeting Public Comment

CFTC,

I am glad that you are taking public opinion to the apparent fraud and manipulation being perpetuated in the precious metal trading markets, of which you are charged with regulating. The public is becoming aware of your inability to regulate this market and I hope that your committee will begin to take action. Everyday investors are moving into the precious metals market and in doing their due diligence analysis are becoming aware of your committees ineptness.

Corey W. Klessig
