David Stawick, Secretary
Commodity Futures Trading Commission

4/19/10

Regarding: Proposed Federal Speculative Position

Dear Mr. Stawick:

Thank you for the opportunity to comment on the position limits of precious metals. It is the correct time for the CFTC to correct the blatant short side manipulation in the silver market. Follow the example of the SEC which has 'dared' accuse Goldman Sachs of impropriety. The SEC is finally doing their job. The public loves it. Now it is the CFTC's turn. You can start by restoring the integrity to the silver market. If a trader can not possibly deliver the physical product against his extraordinary large short position, then you know the trader is trying to manipulate the market. A trader should only be permitted to short the number of contracts for which he can deliver the physical product, should the situation arise.

Thank you for all your efforts to improve the integrity of the markets.

Sincerely,

Richard L Fein
